

Borko Petrevski

Senior Frontend Developer | Full-Stack Engineer

borko.petrevski@gmail.com | +49 176 641 12766 | Ingolstadt, Germany | digilence.io/projects

WORK EXPERIENCE

Arcalytics

Aug. 2025 – Present

Frontend Engineer | Full-Stack Developer

Remote

- Own the complete frontend of a purpose-built chemical, biological, radiological, and nuclear (CBRN) threat-intelligence platform powered by open-source intelligence (OSINT), spanning plain-language search, a live operational map, intelligence dashboards, and the admin back office.
- Built a Tailwind-based component library from the product design system and delivered pixel-perfect interfaces with purposeful micro-animations and fast, responsive interactions.
- Optimized data-heavy map rendering and interaction for smooth zooming and navigation; delivered the initial product demo used in the startup's pre-seed fundraising and contributed to AI/backend workflows.

KLAIM AI

Mar. 2025 - Feb. 2026

Frontend-Focused Full-Stack Developer | Contractor, then Full-Time

Dubai, UAE (Remote)

- Joined as a contractor for three months and transitioned to a full-time role, owning major frontend initiatives across KLAIM's healthcare products for the UAE, Oman, and Saudi Arabia.
- Designed and built klaim.ai and client-facing portals for onboarding, KYC, document management, forms, personal data, and AI-assisted document analysis.
- Created multi-step document workflows with clear animated processing states and AI-powered data prefilling, giving users continuous feedback across complex onboarding requirements.
- Migrated the product from React and a custom Ant Design library to Next.js, then rebuilt the design system as a modern, reusable foundation for future products; also delivered API integrations and selected backend features.

Upgrade Group

Sep. 2024 - Feb. 2025

Software Developer

Ingolstadt, Germany

- Built custom landing pages and web experiences for agency clients, focusing on responsive UI, performance, and conversion-oriented journeys that support lead generation.
- Worked with design and marketing stakeholders to deliver frontend and backend components, API integrations, and production deployments.

Digilence

Jun. 2019 - Present

Independent Full-Stack Developer

Remote

- Independently designed and delivered the products in the Digilence portfolio, including SaaS platforms, marketplaces, ecommerce systems, mobile apps, and high-conversion marketing websites.
- Owned delivery end to end - product discovery, UI/UX, pixel-perfect frontend implementation, selected backend and AI integrations, deployment, and ongoing maintenance.

- Built reusable design systems and polished responsive experiences with Next.js, TypeScript, Tailwind CSS, React Native/Expo, Payload CMS, Convex, and AI/RAG integrations.
